

## ATS ARE GIVING AWAY **PHONE SYSTEMS FOR FREE!!**

ATS is a large Irish owned telecommunications company and during our 16 years in business, we have supplied and installed phone systems throughout the country for all types of public & private businesses ranging from 2 to 200+ users.

We have recently commenced a technology refresh project for a large multisite customer and as a result we have recovered a significant number of Toshiba DK280 2<sup>nd</sup> user phone systems and 100's of handsets. We originally supplied these systems and have maintained them during their time with the bank and can testify that they are all in good working order.

We are very reluctant to dispose of them as not only do we feel that it is wasteful, but its also adding to an environmental waste issue which is bad enough as it is.

We have therefore launched an initiative whereby we will donate a phone system, handsets and voicemail system to start up companies, expanding young companies or charity & not for profit organisations. The only cost to them would be a small installation fee per system starting at aprox €300 euro depending on the size of the sites.

If you would like to avail of one of these systems, please call our Operations Manger, Wendy Riordan on **(01) 2079500**.

### **About Toshiba DK280**

*The Toshiba DK280 is a fully digital hybrid telephone system. It has the capacity to hold up to 60 lines and 244 extensions.*

*This is a modular system which builds from 1 to 6 cabinets to deliver the size of system that your business needs, with the kind of features previously associated with very large systems.*

*Features of the system include: access restriction, toll restriction, day ringing, night ringing, trunk groups, paging, do not disturb and music on hold.*
